Install from:

○ Installer disc:

No drives available

● Installer disc image file (iso):

How do you want to clone this virtual machine?

Clone method

● Create a linked clone
A linked clone is a reference to the original virtual machine and requires less disk space to store. However, it cannot run without access to the original virtual machine.

○ Create a full clone
A full clone is a complete copy of the original virtual machine at its current state. This virtual machine is fully independent, but requires more disk space to store.
